

Environmental Policy

Our mission at Vidak is to help people love their work. This doesn't stop with client projects, but also extends into our own company, and the environment we work in.

Vidak shall fulfil its social obligation as a good corporate citizen, striving for harmonious balance between its business activities and the global environment and taking care to use its resources efficiently and prevent pollution. Vidak will:

- Ensure that environmental considerations are included in all aspects of our business operations.
- Strive to continually reduce the environmental impact of our business by conserving materials and resources in our operations.
- Comply with all relevant environmental law and regulations by implementing environmental practices and procedures that will protect the environment, including preventing pollution, sustainable resource use, climate change mitigation and reduction of adverse environmental impacts.
- Set and use environmental objectives and targets to drive performance improvement, monitoring and reporting procedures to communicate our performance internally and externally to our stakeholders and interested parties.
- Strive to continuously improve our environmental performance and to reduce our impacts through regular review of our activities, practices and procedures.
