Workbench

Retreat

Workbench

FEATURES

Retreat Workbench is part of the versatile range of free-standing booths and screens which support agile work throughout the open-plan office. The partially enclosed, fixed-height worktop creates a space efficient focus area or collaboration bench for four to six people.

Single or dual work focus or collaborative settings

Optional single or double overhang for touchdown space

Screens upholstered in fabric of your choice 1370W+

Frame powdercoated in black or white

Range of integrated power options to choose from

Cable slings under desktop for cable management

Optional integrated, energy-efficient LED lighting with daylight and presence sensor technology.

Optional accessory hooks for hanging toolboxes, whiteboards and other accessories.

3 year warranty

4-6 week lead time

Type A - Single worksettings with no overhang

Type B - Dual worksettings with double overhang

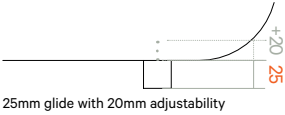

Type D - Collab worksetting supporting 4 or 6 people

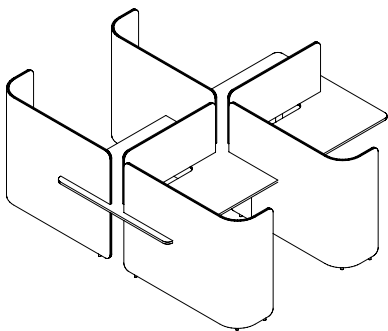

Type C - Single worksettings with fully enclosed screens and single overhang

Collab worksettings power options - No provision for power option / P3 / P4 / P5

Softwiring

FEATURES

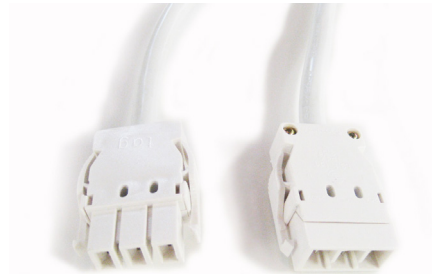

Softwiring, Modular Wiring, or “Plug and Play Wiring” enables the easy use and re-use of electrical wiring components when installing or re-configuring commercial office workstations without the additional churn cost associated with hard wiring. This not only saves time and increases productivity during on-site installation, but also gives the end maximum flexibility for future expansion

Softwiring is the PLUG + PLAY alternative to electricians pulling cables through workstations and hard terminating

It is the medium by which a client's workstation electrical installation system can be easily reconfigured to cater for frequent moves and changes

Utilizing a fully modular 20Amp connector system on all cables and power outlets, it is both cost effective and environmentally friendly, as all components of the system are fully re-useable

Softwiring normally commences from an underfloor, in ceiling starter socket, or mounted on a standard wall plate

Softwire lead fitting

Starter box wall mounted
