Ondo Docking Station

FEATURES

Ondo seamlessly integrates into your CBS monitor arm to offer fast, clutter free connections between your laptop and the other technology on your desk.

Used in conjunction with an underdesk docking station, it neatly manages all power, data, monitor, mouse and keyboard connections. Unsightly cables are kept under the desk out of sight, organised into the compact and tidy Ondo on your desktop. No more hunting around in cluttered cable trays, Ondo gives you neat and easy access to data and power right from your CBS monitor arm.

Compatible with all docking stations with USB-A and C ports, Ondo sets you free to choose your own docking station from your preferred IT supplier. Using the latest in charging and connectivity technology, its two USB-A ports and two USB-C ports ensure your access to power and data is both instantaneous and future proof.

Compatible with Flo, Lima and Ollin monitor arms

Ondo connectivity module offers laptop docking station compatibility

Connect up to 2 x USB-A and 2 x USB-C devices at the same time
