Accessories

Lima

FEATURES

Easy to install and adjust as either a single or dual screen solution.

Adjustment

With the press of a button, Lima allows you to move a screen up or down to the ideal height. And if you're working with dual screens, you can move each one independently. Being able to tailor each screen height and distance to your unique needs helps you adopt a good posture and allows for healthy interaction between you and your technology.

Lima's head offers the ability to tilt the screen up to 80° back or 10° forward. This helps you set the screen to your unique specifications, taking in to consideration lighting in your workspace and the increased use of touchscreen devices in the modern workspace.

Installation

Lima is fast and easy to install. The post and clamp come in one piece, which attaches to the desk using a thumbwheel screw, and the arm then slides into the grooves on the post. And all you need to attach your screen to the VESA mount is a screwdriver.

Adjustment

Available in White, Black and Grey.

Posts available in anodized Black and Grey.

Independent screen adjust and simple installation

Modular cable management system

Effortless upgrade to dual screen
